Marine and Offshore Electrical Installations

Introduction:

Since being established in 2001 Marine Electrical Installations Ltd have been involved with new build, refit and refurbishment projects on Oil Rigs, Cruise Ships, Accommodation Modules and Car Ferries around the world.

We are able to offer our customers a comprehensive electrical turnkey service that brings together all aspects of electrical and mechanical engineering and delivers the supply of cable, essential electrical equipment and accessories. Customers can utilise the broad range of services we provide through a single point of contact.

Installation, quality and customer satisfaction are assured by the use of our highly trained, competent and experienced personnel. We only use agencies or temporary staff as a last resort. This practice brings added benefit to the customer in reduced costs and the saving of valuable time.

Continuity in our personnel has been seen to reduce the need for the repetition of vessel/staff familiarization and induction programs, thus reducing safety training costs and valuable labour time.

A vessel familiar workforce also assures specification, work scope and health and safety familiarisation as well as an open and positive working relationship between crew and our workforce on projects.

Our experience in project managing contracts for assets of all sizes ensures we deliver a commitment to quality and an assurance of work carried out to specification, on time and within budget.

In appointing Marine Electrical Installation Ltd, your company will be secure in the knowledge that it has a team of experienced professionals able to support and fulfill your requirements.

Our aim is to work with our customers to meet the demands of the ever changing marine and offshore environments promoting safety, team work, communication and co-operation at all times.

Safety & Quality:

The growth and success of Marine Electrical Installations Ltd relies on a management system with a strong focus on safety, quality and environmental concerns.

Our objective is to ensure that specified safety and quality standards are reflected in all our activities at every level within the organisation.

We aim to provide a risk free and safe working environment for all our employees, on land and at sea. Through our continuous training development programme and good working practice we will achieve safe operations and prevention of accidents.

Our accreditation to the ISO 9001:2008 standard will give extra comfort to our customers, assuring them that we truly are a customer-focused organisation, with strong leadership and that we have a culture of continuous improvement: This continuous improvement is at the heart of our business helping us to continually re-evaluate our products and services and ensure they are meeting the ever-changing demands of our customers. Having this externally accredited to ISO 9001:2008 standard will give our customers, both current and future, additional confidence when dealing with Marine Electrical Installations Limited.

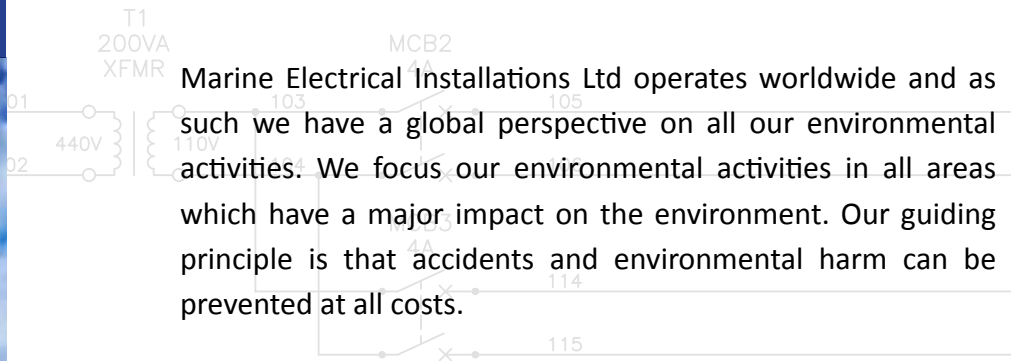

We have recently upgraded our FPAL membership to FPAL verify, which will give our Oil & Gas customers peace of mind that they are dealing with a company who has social and corporate responsibility at the foremost of every action which will minimize risk to all stakeholders thus increasing profitability & sustainability.

Vessel operation: Vessel supplies and service to marine and offshore installations will be carried out in a professional, efficient and safe manner in accordance with all applicable rules and regulations. All employee's are encouraged to familiarise themselves with all documentation and instructions issued by management.

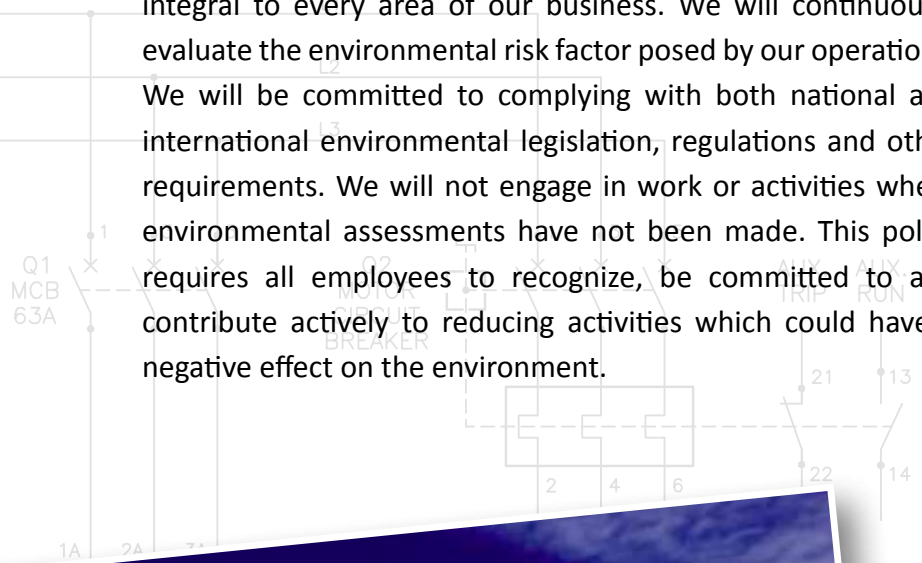

Environmental:

MCB1

Marine Electrical Installations Ltd operates worldwide and as such we have a global perspective on all our environmental activities. We focus our environmental activities in all areas which have a major impact on the environment. Our guiding principle is that accidents and environmental harm can be prevented at all costs.

Continuous improvement and prevention of pollution are integral to every area of our business. We will continuously evaluate the environmental risk factor posed by our operations. We will be committed to complying with both national and international environmental legislation, regulations and other requirements. We will not engage in work or activities where environmental assessments have not been made. This policy requires all employees to recognize, be committed to and contribute actively to reducing activities which could have a negative effect on the environment.

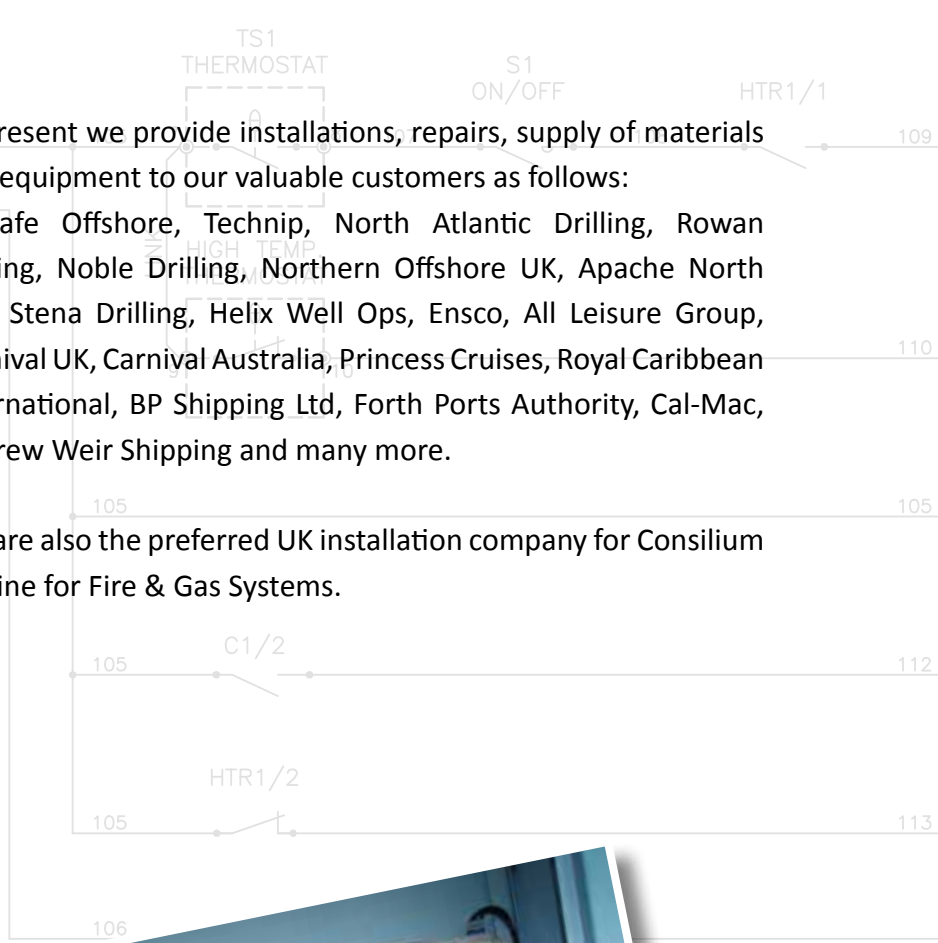

Customer Base:

At present we provide installations, repairs, supply of materials and equipment to our valuable customers as follows:

Prosafe Offshore, Technip, North Atlantic Drilling, Rowan Drilling, Noble Drilling, Northern Offshore UK, Apache North Sea, Stena Drilling, Helix Well Ops, EnSCO, All Leisure Group, Carnival UK, Carnival Australia, Princess Cruises, Royal Caribbean International, BP Shipping Ltd, Forth Ports Authority, Cal-Mac, Andrew Weir Shipping and many more.

We are also the preferred UK installation company for Consilium Marine for Fire & Gas Systems.
